Prepared by the Commodity and Trade Analysis Branch, Commodity Economics Division, Economic Research Service, U.S. Department of Agriculture. Principal coordinators are Thomas A. Warden and Mary L. Fant. Lilia George provides word processing and table formatting support. Editorial support is furnished by Jim Carlin, Research Information Branch, Information Division, Economics Management Staff. Data processing support is provided by Sharlan Starr and William Meiller, Agriculture and Trade Analysis Systems Branch, Data Services Center.

Digest

Exports Steady in Early FY 1993 (see p. 2). Export value, at \$19 billion during the first 5 months of FY 1993 (October 1992-February 1993), was virtually unchanged from a year earlier. Shipments to the former Soviet Union plunged more than \$800 million, and shipments to China fell more than \$200 million. These losses, however, were offset by increased exports to South Africa, Canada, Mexico, the European Community, Eastern Europe, and other destinations.

Farm Product Imports Gain 4 Percent In Early FY 1993 (see p. 5). U.S. agricultural imports totaled \$10.1 billion for the period October 1992 to February 1993, 4 percent higher than the same period last year. Imports advanced largely on the strength of cattle, vegetables, vegetable oil, and unmanufactured tobacco. Fruit juice, coffee, and cocoa imports declined. Canada and Mexico were the leading sources of imports, rising to \$1.8 billion and \$1.2 billion, respectively. Imports from Brazil, at \$495 million, were weaker than last year.

State Export Shares Increase in FY 1992 (see p. 6). The United States exported \$42.4 billion of agricultural commodities in FY 1992, an increase of 13 percent from 1991. Most States exported more agricultural commodities in 1992 than in 1991, and 15 States exported more than \$1 billion in agricultural commodities. Export share estimates placed California at the top for the eighth consecutive year. Iowa ranked second, followed by Nebraska, Illinois, Texas, Kansas, Minnesota, North Dakota, Indiana, and Washington.

Exports Steady in Early FY 1993

Export value, at \$19 billion during the first 5 months of FY 1993 (October 1992-February 1993), was virtually unchanged from a year earlier. Shipments to the former Soviet Union plunged more than \$800 million, and shipments to China fell more than \$200 million. These losses, however, were offset by increased exports to South Africa, Canada, Mexico, the European Community (EC), Eastern Europe, and other destinations.

Exports of high-value products (HVP) grew more slowly than during the past 2 years but reached a record \$10 billion. U.S. horticultural exports had their weakest growth since the middle of the 1980's as declining fruit and nut exports offset increased shipments of vegetables. U.S. exports of livestock products rose 3 percent during the first 5 months of FY 1993, compared with 8-percent and 11-percent growth during similar periods in FY 1991 and FY 1992. Large declines in the value of livestock-product exports to Mexico and the EC partly offset gains to Japan, the former Soviet Union, and Eastern Europe.

Bulk products accounted for both the biggest gains by commodity and the largest decline of any single commodity during October-February. The largest commodity gains were for soybeans (\$261 million), corn (\$165 million), and wheat (\$137 million). The largest decline of any single commodity was cotton's \$414-million drop. Bulk exports, therefore, rose just 1 percent overall.

Soybean exports climbed from 10 million tons to 12 million tons as EC demand rose and South American supplies remained weak. Increased EC demand for imported soybeans followed a decline in EC oilseed production caused mostly by a drought in northern Europe that reduced rapeseed yields. EC supplies of rapeseed were further tightened as producers slowed sales to protest low prices and rapeseed exports increased, chiefly to Japan, which sought new sources of high-quality rapeseed to replace reduced supplies from Canada. Reduced EC market prices, reflecting a new oilseeds policy regime, encouraged exports and created opportunities for U.S. soybeans.

Value of Grain Exports Rises

Corn exports rose largely on the strength of shipments to South Africa. Since the beginning of FY 1992, drought-reduced production has led to large purchases of U.S. corn by South Africa. Since 1992's shipments were not yet underway during the first 5 months of FY 1992, 1993's \$195 million in October-February shipments constituted nearly a 100-percent increase.

Shipments to Canada also rose, but by a lesser amount, \$60 million. However, Canada exported corn to the United States as well as imported U.S. corn during 1992 and 1993. Canada's corn exports to the United States declined \$21 million on a year-to-year basis during October-February for a net \$80-million shift in favor of the United States. Canada's increased imports and decreased exports followed damage to Ontario's corn crop by a cool, wet growing season and adverse harvesting conditions. Ontario is Canada's primary corn-producing province.

Wheat exports grew \$137 million compared with corn's \$165 million, and shipments of each grain to the former Soviet Union declined precipitously, \$295 million and \$213 million, respectively. But, wheat and corn demonstrated quite dissimilar price performance during October-February: the average price of U.S. wheat exports rose 14 percent between FY 1992 and FY 1993, while the average price of corn fell 12 percent. While a record U.S. corn crop drove prices lower, wheat prices were buoyed by lower supplies of exportable-quality wheat from Canada and larger prospective imports by a number of countries.

The value of U.S. cotton exports fell \$414 million (37 percent) as export volume fell by nearly a third and prices fell 12 percent. The volume of world trade fell during the first part of FY 1993 as foreign cotton producers increasingly turned to exporting yarn and textiles rather than raw cotton. This reduced the ability of U.S. cotton customers to export textiles and reduced their purchases of U.S. cotton. *(Stephen MacDonald, Commodity and Trade Analysis Branch, 202-219-0822)*

Table 1--Agricultural, nonagricultural, and total trade balance of exports and imports

Farm Product Imports Gain 4 Percent in Early FY 1993

U.S. agricultural imports totaled \$10.1 billion for the period October 1992 to February 1993, 4 percent higher than the same period last year. Imports advanced largely on the strength of cattle, vegetables, vegetable oil, and unmanufactured tobacco. Fruit juice, coffee, and cocoa imports declined. Canada and Mexico were the leading sources of imports, rising to \$1.8 billion and \$1.2 billion, respectively. Imports from Brazil, at \$495 million, were weaker than last year.

U.S. imports from Canada were \$258 million higher than during the same period last year, a 17-percent gain. The largest increases were in cattle, beef, and grains. Cattle imports totaled 561,000 head, a 26-percent increase, and were valued at nearly \$400 million. Beef imports were 10,000 tons larger, and valued at \$133 million. Pork import volume remained unchanged, but firmer prices boosted value by nearly \$14 million over last year.

Wheat imports from Canada topped 620,000 tons, an increase of 77 percent. Durum wheat imports accounted for about a third of the total tonnage. Oat imports were up more than 150 percent to 347,000 tons, but barley shipments were down 74 percent to 52,000 tons.

Mexican exports to the United States were \$215 million higher than last year due largely to a 40-percent increase in vegetable shipments, valued at over \$470 million. Fresh tomato, cucumber, onion, and pepper imports rebounded from last year's weather damage that resulted in unusually low shipments. Mellon sales were down 6 percent, but gains in other fruits kept fresh fruit imports even with last year. Orange juice imports from Mexico fell by over 80 percent, as the strong U.S. domestic citrus crop lowered the total demand for orange juice imports. Cattle imports from Mexico continued to expand, up over 200,000 head from last year to 660,000 head through February 1993.

Imports of Australian beef increased 12 percent to about 150,000 tons, but value was unchanged from a year ago. Total beef imports rose 6 percent to 323,000 tons, but reduced shipments from Argentina and New Zealand offset some of the increases from Australia and Canada.

Total U.S. imports from Brazil were down 19 percent because of declines in citrus juices, coffee, and cocoa. Import volumes of orange juice and cocoa were about the same as last year, but lower prices depressed import values. Grape juice shipments increased over 100 percent to 109,000 hectoliters. The value of imports from Brazil would have been lower except that shipments of filler and scrap tobacco jumped over 200 percent to nearly 40,000 tons, valued at \$114 million.

Total U.S. unmanufactured tobacco imports rose 57 percent to 142,000 tons, but importers shifted to lower quality tobacco. Brazilian tobacco imports, with a unit value of about \$2,900 per ton, were the largest shipments through February, displacing Turkish tobacco imports, valued at nearly \$4,800 per ton. Turkey's tobacco shipments were half the level of last year, leading to a 29-percent drop in Turkey's agricultural exports to the United States.

Both the volume and value of fruit imports from Chile were about the same as a year earlier. Fresh grape shipments rose 6 percent to 148,000 tons, valued at \$112 million. Pear imports increased, but most other Chilean fruit shipments declined. Grape juice shipments plunged 75 percent to 15,000 hectoliters.

Coconut oil shipments totaled 272,000 tons, 94 percent greater than last year, pushing U.S. vegetable oil imports upward. The strong coconut oil imports boosted imports from the Philippines, the main supplier of coconut oil, by 39 percent to \$217 million. Vegetable oil imports totaled \$450 million, up 35 percent, as olive oil, rapeseed oil, and palm kernel oil imports also rose.

The value of noncompetitive imports fell 6 percent to \$2.4 billion because of low coffee and cocoa prices. Banana imports totaled 1.5 million tons, valued at \$430 million, up 3 percent. Last year, Ecuador was the main source of bananas, but its shipments were down 22 percent to 340,000 tons through February. The chief banana supplier so far this year is Costa Rica, which has shipped nearly 410,000 tons. Imports of essential oils, rubber and allied gums, and tea increased in both volume and value. (*Joel Greene, Commodity and Trade Analysis Branch, 202-219-0822*)

State Export Shares Increase in FY 1992

The United States exported \$42.4 billion of agricultural commodities in FY 1992, an increase of 13 percent from 1991. Most States exported more agricultural commodities in 1992 than in 1991, and 15 States exported more than \$1 billion in agricultural commodities. Export share estimates placed California at the top for the eighth consecutive year. Iowa ranked second, followed by Nebraska, Illinois, Texas, Kansas, Minnesota, North Dakota, Indiana, and Washington.

California shipped an estimated \$5.1 billion in exports, an increase of nearly \$345 million. California's dominant position as an exporter of high-value horticultural commodities strengthened the State's hold as the export leader, especially as high-value products (HVP) have climbed to more than half of all U.S. agricultural exports. California's exports of fruits, tree nuts, and vegetables totaled \$3.6 billion, nearly 55 percent of U.S. horticultural exports.

Most U.S. bulk grains and animal products are exported by the top 10 exporting States, and the significant gains in exports of wheat, soybeans, and live animal and meat products in 1992 boosted export share estimates for all those States except Indiana. Iowa remained second in exports with bolstered soybean and pork shipments. Nebraska moved up to third, ahead of Illinois and Texas, due to a \$115-million increase in exports of live animals and meat, as well as some smaller gains in feed grains and wheat exports. Illinois and Texas exports grew slowly, at 3 and 4 percent, respectively. Illinois feed grain exports declined as total U.S. corn exports dipped. Texas cotton shipments fell more than \$250 million as total cotton exports declined.

Kansas remained sixth with a strong increase in wheat exports to \$823 million to lead the United States in that commodity. Minnesota exports were up 17 percent, with increases in wheat, soybeans, and live animals and meat. Strong dairy exports also benefited Minnesota as its share rose \$25 million. North Dakota advanced the most in 1992, from the 17th position to 8th. Much of North Dakota's gain was attributed to strengthened hard red spring wheat sales and

increased exports of feed grains and sunflower-seed oil. Indiana slipped back to ninth as exports declined \$62 million, because 1991 production dropped for wheat and feed grains and held steady for soybeans. Washington dropped one place to 10th, but its exports were over \$160 million higher than during the previous year because of strong apple and vegetable exports and an increase in white wheat exports.

In 1992, 55 percent of U.S. exports were HVP's. The increase in HVP exports raised the exports of States that are not traditionally the largest exporters. Colorado's exports of live animals and meat increased nearly \$45 million to \$214 million. A 19-percent rise in poultry exports led to substantial gains for Arkansas, Georgia, and North Carolina. Wisconsin's dairy exports rose from \$72 million to \$163 million, as U.S. dairy exports reached a record level. Florida citrus exports advanced over \$100 million, and Arizona, Michigan, Oregon, and Pennsylvania gained from increased fruit exports. Higher vegetable exports were recorded by Arizona, Oregon, and Wisconsin.

The estimates of State export shares were based on the National Agricultural Statistics Service's crop production estimates. Each State was assigned an export share based primarily on its production share. However, when appropriate, supplemental data (customs district data, domestic use data, and the Census of Agriculture data, for example) were used to adjust the export share. Updated production estimates were used and, when possible, specific exported commodities were distributed based on more disaggregated production estimates than in the past, particularly for horticultural commodities. Seed export estimates changed substantially as the major field crop seeds were included under the specific commodity category. Additional States were included this year as exporting States. For example, the export shares for wheat and products were adjusted to reflect that some States, particularly those with substantial milling industries and some wheat production, export wheat flour and wheat products. The 1990 and 1991 estimates were revised to reflect changes in the methodology for the 1992 estimates. (*Joel Greene, Commodity and Trade Analysis Branch, 202-219-0822*)

INDEX OF APPENDIX TABLES

Table	Exports	Page
A-1	U.S. agricultural exports: Quantity and value by commodity	A-2
A-2	U.S. agricultural exports: Quantity, value, and unit value by commodity and country, October-February 1991/92 and 1992/93, and February 1993	A-5
A-3	U.S. wheat exports: Quantity (1,000 MT) by destination, October-February 1991/92 and 1992/93	A-69
A-4	U.S. coarse grain exports: Quantity (1,000 MT) by destination, October-February 1991/92 and 1992/93	A-70
A-5	U.S. soybean exports: Quantity (1,000 MT) by destination, October-February 1991/92 and 1992/93	A-71
A-6	U.S. agricultural exports: Value (1,000 dol.) by destination, October-February 1991/92 and 1992/93	A-72
Imports		
B-1	U.S. agricultural imports: Value (1,000 dol.) by country of origin, October-February 1991/92 and 1992/93, and February 1992 and 1993	B-1
B-2	U.S. agricultural imports: Quantity and value by commodity	B-2
B-3	U.S. agricultural imports: Quantity, value, and unit value by commodity and country, October-February 1991/92 and 1992/93, and February 1993	B-5
Prices		
C-1	Foreign currency units per U.S. dollar	C-1
C-2	Domestic and foreign wheat prices	C-2
C-3	Corn, sorghum, rice, and cotton prices	C-2
C-4	U.S. and northern European soybean and product prices	C-3
C-5	U.S. import prices	C-3

Appendix table A-1--U.S. agricultural exports: Quantity and value by commodity

Central and Eastern European Agriculture Adapts to Open Markets

Number 10, February 1993

Contact: Jason Lamb, (202) 219-0620

Central and Eastern European (CEE) agriculture underwent dramatic change during the last 3 years. The introduction of market pricing, open borders, and increased freedom of entry and exit for firms occurred without the institutional and legal structures necessary for a market economy. Progress varies widely by country, but the northern countries of Poland, Hungary, and the Czech and Slovak Republics are much further along than the southern countries of Bulgaria, Romania, and Yugoslavia. The effect of market reforms on agriculture is documented in the 76-page report, *Agricultural Policies and Performance in Central and Eastern Europe, 1989-92* (FAER-247).

Many CEE countries shifted from pre-reform tight agricultural supplies or outright shortages to post-reform surpluses. Food availability and diversity have increased appreciably. Food prices have risen in nominal terms, but generally have lagged behind the overall inflation rate, reducing the prices of many food items relative to other goods and services.

But, farm financial performance has been poor. Food prices have risen, but less than farm input prices. Many issues regarding land and asset ownership in the farm sector remain unresolved, leading to uncertainty for planting and production. Consumer demand for agricultural products is depressed due to the sudden rise in consumer prices, while nominal income growth has been restricted through wage/pension caps. In addition, where the farm sector previously enjoyed unlimited demand for its products, it now faces stiff competition from a wider array of consumer products.

U.S. Export Opportunities

The value of U.S. agricultural exports to CEE countries dropped in 1991 due to the CEE's lack of hard currency needed to buy U.S. agricultural products and, more important, the CEE surplus of agricultural products from lower domestic demand and bumper grain harvests. U.S. agricultural exports of \$225.3 million in 1991 were well below the 1990 level of \$536.2 million. The level of U.S. agricultural exports has been bolstered by

food aid granted to the CEE area, especially to Romania. CEE markets should stabilize and diminish the need for food aid.

Long-term export opportunities exist for U.S. agricultural inputs, machinery, and processing facilities, as well as soybeans and meal, cotton, tobacco, rice, certain specialty foods (nonindigenous fruits and fruit products, nuts), and consumer-ready foods. In addition, U.S. expertise in financing, farm management, and food processing is needed in the CEE countries. More short-term food aid may be needed in Albania, Romania, and some of the former Yugoslav republics.

Agricultural Production Steady as Domestic Demand Drops

The problems faced by the CEE agricultural sector had a smaller impact on production in 1991 than economists expected. Gross agricultural production in the region declined by 4.9 percent compared with 1990. Production levels in 1991 for most grains exceeded their 1986-90 averages, while many livestock and oilseed products fell below their 1986-90 levels.
